Kuala Lumpur, Malaysia

Phone: 014-8069980 | Email: wanahmadsyahmi26@gmail.com

Career Objective

Ambitious and dedicated Senior Full Stack Web Developer with progressive experience from junior to senior-level roles. Passionate about expanding knowledge in advanced web development, server management, and critical thinking. Eager to achieve expertise in backend server management and lead teams to deliver robust, scalable web solutions.

Work Experience

Senior Full Stack Web Developer / Team Lead

Les' Copaque, Shah Alam | May 2024 - Present

- Led a team of developers in designing and delivering complex, user-centered web applications, ensuring high code quality and adherence to project timelines.
- Collaborated closely with product managers and stakeholders to define project goals and align development efforts with business objectives.
- Developed and optimized server-side logic and API integration, reducing server load time by 30% and enhancing system efficiency.
- Implemented a CI/CD pipeline using GitLab, improving deployment speed and reliability by 40%.
- Conducted code reviews and provided mentorship to junior team members, fostering a collaborative team environment.

Mid Full Stack Web Developer

Etctech Global Sdn Bhd, Damansara | July 2023 - May 2024

- Contributed to full-stack development in a fast-paced environment, working on both client-facing and internal applications using Laravel, VueJS, and AWS services.
- Spearheaded the migration to a modular front-end structure with VueJS, resulting in a 25% increase in development efficiency.
- Integrated third-party services like Stripe and SendGrid for streamlined payment processing and automated emailing, enhancing application functionality.
- Collaborated with cross-functional teams to improve application performance, leading to a 15% reduction in load times.

Junior Full Stack Web Developer

Operation Website Design, Penang | May 2022 - July 2023

- Developed and maintained multiple client websites, focusing on responsive design and high-quality user experiences using PHP, Bootstrap, and VueJS.
- Created RESTful APIs to facilitate seamless communication between the frontend and backend, reducing response time by 20%.
- Assisted senior developers with database optimization and debugging, gaining hands-on experience in SQL and PHP frameworks.
- Successfully delivered 10+ client projects, receiving positive feedback on performance, user experience, and functionality.
